

Frequently Asked Questions

Getting Started

What is ExploreCME?

ExploreCME is an intelligent study platform designed specifically for healthcare professional students and clinicians preparing for coursework, clinical rotations, End of Rotation (EOR) exams, PACKRAT, PANCE, and other certification examinations. Rather than relying on memorization alone, ExploreCME uses personalized analytics and adaptive technology to help you identify knowledge gaps and focus your study time where it will have the greatest impact.

What information can I see on my dashboard?

Your personalized dashboard gives you an instant snapshot of your overall progress, including:

- **Overall Percentage Correct** – Your accuracy across all completed questions.
- **Total Question Attempts** – A record of how many questions you've completed.
- **Cumulative Performance** – A longitudinal view of your progress over time.

These metrics help you monitor improvement and stay focused on your learning goals.

How do I identify my weakest areas?

ExploreCME includes a **Knowledge Gap Analysis** that displays interactive radar graphs showing your performance by:

- Organ System
- Task Area

These visual reports make it easy to recognize strengths while identifying areas that need additional review.

Where can I find my quizzes?

All quizzes you've created are stored in the **My Quizzes** section. From there you can:

- Resume unfinished quizzes
- Review completed quizzes
- Organize previous study sessions
- Track your progress over time

This makes it easy to study whenever your schedule allows.

Quiz Modes

What's the difference between Test Mode and Study Mode?

Test Mode

- Simulates a real examination environment.
- No answers or explanations are shown until the quiz has been submitted.
- Ideal for measuring exam readiness.

Study Mode

- Provides immediate feedback after each question.
 - Designed to reinforce learning as you progress.
 - Excellent for mastering new concepts and correcting misconceptions.
-

What Study Mode options are available?

You can choose between two learning styles:

Study Mode without Explanations

- Shows the correct answer immediately after each question.
- Perfect for rapid review and pattern recognition.

Study Mode with Explanations

- Provides the correct answer along with concise educational rationales.
 - Reinforces key concepts using current evidence-based guidelines.
-

Can I compare my performance with other students?

Yes. Study Mode includes **Global Statistics**, allowing you to see how other users performed on each question. This helps you determine whether a question represents a personal knowledge gap or a topic that many learners find challenging.

Can I provide feedback about a question?

Absolutely. Every question includes a simple **thumbs up/thumbs down** feedback option. Your feedback helps our team continually improve the quality and accuracy of the question bank.

Creating Quizzes

How does Build from Blueprint work?

The **Build from Blueprint** feature allows you to fully customize your quiz by selecting:

- Organ systems
- Task areas
- Individual clinical topics
- Number of questions

ExploreCME first searches the existing question bank for matching content. If additional questions are needed, our AI engine generates new questions that match your selected blueprint while maintaining educational quality and clinical relevance.

Are AI-generated questions accurate?

Yes. Every AI-generated question undergoes an automated clinical validation process before becoming available. This process evaluates:

- Clinical accuracy
- Educational quality
- Appropriate level of difficulty
- Alignment with current evidence-based practice

Our goal is to provide reliable, high-quality learning content you can trust.

Can I create quizzes from my exam results?

Yes. One of ExploreCME's most powerful features is **Generate from Document**.

Simply upload your performance report from exams such as:

- PAEA End of Rotation (EOR)
- PACKRAT
- PANCE

The platform analyzes your results to identify weak areas across organ systems, task areas, and clinical topics, then automatically creates a personalized remediation quiz focused specifically on those deficiencies.

Why isn't my quiz available immediately?

Quiz generation occurs in the background to ensure every question meets our quality standards. Depending on the size of your quiz and whether new questions must be generated, processing may take several minutes.

Once completed, your quiz will automatically appear in the **My Quizzes** section.

Question Bank & Quality

How often is the database updated?

ExploreCME's question bank is continuously expanding.

The **Database Overview** on the home page provides transparent information about:

- Total number of available questions
 - Distribution by organ system
 - Distribution by task area
 - Overall database growth
-

How do you keep questions current?

We are committed to maintaining a high-quality, evidence-based question bank.

Every question undergoes regular review to ensure:

- Clinical information reflects current medical practice
- Answer choices remain accurate
- Educational explanations incorporate updated guidelines
- Questions continue to meet the needs of healthcare professional learners

This ongoing quality assurance process helps ensure you're studying the most current material available.

Technical Support

Who do I contact if I need help?

If you experience technical difficulties or have questions about using ExploreCME, our support team is here to help.

Email: customer.support@explorecme.com

We strive to respond promptly and resolve issues as quickly as possible.

Why Choose ExploreCME?

ExploreCME combines intelligent analytics, customizable quizzes, AI-assisted content generation, and rigorous clinical validation into one comprehensive learning platform. Whether you're preparing for coursework, clinical rotations, EOR exams, PACKRAT, PANCE, or lifelong clinical practice, ExploreCME provides the personalized tools you need to study more efficiently, build confidence, and achieve success.

This version is optimized for a modern FAQ page, using concise questions, scannable answers, and clear section headings while remaining professional and approachable for healthcare professional students.
